

Dear Moto,

We would like to take a few moments to thank yourself and the Miura Foundation for allowing us to host students for the last two decades. I feel like the Matriarch (Grandmother) of the host families here in Canada.

Over the past years we have thoroughly enjoyed having the students stay in our home and have tried to show them how Canadians live, cook, eat and entertain on a every day basis. Most of the time we spent talking and listening to their views and getting to know them. We have taken the students paddling down the river in a canoe, gone to the Horse Racing Track, to the local Native Indian Reservation, and of course shopping.

All of the students we had in our home were respectful, helpful in so many ways and we feel they enjoyed being immersed in speaking English and were always willing and eager to learn. It was always a sad time to see them get into the Van for the start of their trip home, but we always knew they absorbed and learned things they would likely never be exposed to without the support of the Miura Foundation and the hours of work by yourself and staff to make it all come together.

Both Paul and myself are approaching 80 years young and are in retirement mode, but should you ever need us as back-up or in an emergency we are always available...again thank you for enriching our lives.

Yours truly,

Marilyn Wilson
